	Title
1	Method and apparatus for load balancing a distributed processing system
2	Interoperability of accounting packages and commerce servers
3	Method and apparatus for converting data between two dissimilar systems
4	Method and system for real-time transactional information processing
5	Registry driven interoperability and exchange of documents
6	Vocabulary and syntax based data transformation
7	Method and apparatus for monitoring and logging the operation of a distributed processing system
8	Supplier/reseller interaction
9	Supplier/reseller interaction
10	Supplier/reseller interaction
11	Supplier/reseller interaction
12	Supplier/reseller interaction
13	Interoperable retrieval and deposit using annotated schema to interface between industrial document specification languages
14	System and method for transmission of information between locations on a computer network with the use of unique packets
15	Adaptive multi-protocol communications system
16	Gateway for securely connecting arbitrary devices and service providers
17	System and method for transmission of information between locations on a computer network with the use of unique packets
18	XML system
19	Distributed processing system and method
20	Method and apparatus for load balancing a distributed processing system
